Student’s Guide for:
Turning Technologies QT Clicker
How do I register my clicker?

You must register your clicker on Canvas before using it in class.

→ Go to Canvas: http://oregonstate.instructure.com
→ Navigate to the left sidebar menu of the Canvas dashboard.
→ Click on Account > Settings > TurningClicker Registration
→ Login with your Turning Account using your OSU email address (e.g., dorboloj@oregonstate.edu)

To add a license:
→ Click on the License box and then Add a License.
→ Type in the code on your license card and hit redeem.

To add a device:
→ Click on the Device box and then Add a License.
→ Type in your device ID located on the backside of your clicker.

Need help? Contact clickers@oregonstate.edu or visit us at 466 Learning Innovation Center (LINC)
Have you had the HPV Vaccine?

A. Yes
B. No
C. I don’t know?
D. What are talking about?
Which disease has slow onset?

A. ACTUTE
B. CHRONIC
C. TERMINAL
Can I share my clicker with another student?

→ We do not allow multiple students to share a single clicker. By implementing this policy we aim to avoid confusion with the Turning Technologies software – which receives your responses – and Canvas which assigns point values to your name. Sharing clickers results in clicker points being misallocated to students; in most cases you – and your friend – will not receive any points from a shared clicker.

What if I have a question about clicker points on Canvas?

→ Most instructors have their own policy regarding clicker points on Canvas. Please consult your instructor’s course syllabus for exact information. When asking your instructor about clicker points, be prepared to have your device ID handy.

What if my clicker isn’t functioning properly?

→ Students can get clicker support from the OSU Walk-Up Computer Helpdesk in the Valley Library. Disability Access Services provides support for the accessible clicker.
How do I change the channel?

Each class using clickers is assigned a different channel. Your clicker must be on the correct channel to send responses.

➔ Press any button to turn on your clicker
➔ Press the **channel** button
➔ Enter the **channel number**
➔ **Submit** the channel number

Need help? Contact **clickers@oregonstate.edu** or visit us at 466 Learning Innovation Center (LINC)
How do I know if my response is received?

→ When your response is received your clicker will show either a smiley face or a checkmark underneath your answer. These confirm that your response has been received.

→ If you seed the “hand” icon, 🙋, before or after submitting your answer you have sent your response **incorrectly**. You will not receive any points for your response. In this case, click the back arrow, ↩️, until you return to the main screen.

→ There is also a “toolbox” feature on all QT clickers. Responses **cannot** be sent with the toolbox open. When in doubt, press the back arrow, ↩️, repeatedly to exit to the main screen before submitting an answer.
Why does my clicker look different from others?

Your QT clicker may look slightly different in appearance from another student’s due to different firmware versions. For those who still have NXT clickers, there are currently as many as three different firmware versions around campus; all of which are valid. Such differences include:

→ Checkmark response confirmation vs. smiley response confirmation
→ Backlit LCD screen
→ Multi-directional buttons vs. bi-directional buttons surrounding the submit button

For **QT clickers**, you should have the checkmark response, backlit screen and multi-directional buttons.
