The Impact of Response Technology

INCREASE ATTENDANCE
Response technology can increase attendance by 30%.

LET EVERYONE'S VOICE BE HEARD.
Anonymous questions can lead to 70% of learners being more likely to participate.

ENRICH LECTURES
Student feedback indicates that response technology makes class lectures more engaging (87%) & motivational (63%).

RETAIN KNOWLEDGE
Learners can see a 40% increase in retention of materials with SRS.

HELP STUDENTS SUCCEED.
Researchers found that the percentage of students earning A’s increased from 23% to 40% with the use of SRS. Another study showed students using SRS scored 11% higher on post-test scores.

STUDENT RESPONSE SYSTEMS (SRS) allow instructors to ask interactive questions, track student progress and receive instant feedback using clickers or smart phone apps.

INNOVATION. RETENTION. GRADUATION.

ENGAGE LEARNERS with technology to improve retention and completion in the first year and beyond.

*For first-time, full-time undergraduate students who began their pursuit of a bachelor’s degree at a four-year degree-granting institution in fall 2008.
