

Response Systems

1. How many terms have you used a response system in class?

2. What are the approximate total number of students using response systems in your courses in a term?

3. Which response system do you currently use?

- iClicker
- Qwizdom
- TurningPoint
- Other

Please specify other here:

4. Are you satisfied with the response system that you are currently using?

5. Please explain your answer to the above.

6. What is the degree of reliability of the response system that you are currently using?

7. Are you satisfied with the level of technical support that you receive for the response system that you are currently using?

8. What is the degree of ease of use (i.e. usability) of the response system that you are currently using?

9. Are you satisfied with the features and options of the response system that you are currently using?

10. How valuable to your teaching is the use of a response system in your classes?

11. How valuable to your student's learning is the use of a response system in your classes?

12. How do students react to your use of a response system (generally) in your classes?

13. Do you (or do you plan to) use a response system to track class attendance?

- Yes
- No
- Not sure

14. Do you (or do you plan to) post response system outcomes for students?

- Yes. I post the results to Blackboard (or plan to do so)
- Yes. I make the results available without using Blackboard (or plan to)
- No. I do not make the results available to students (and do not plan to)

15. Do you (or do you plan to) use a response system to give quizzes or exams?

- Yes
- No
- Not sure

16. Do you (or do you plan to) post response system quiz or exam outcomes for students?

- Yes. I post the results to Blackboard (or plan to do so)

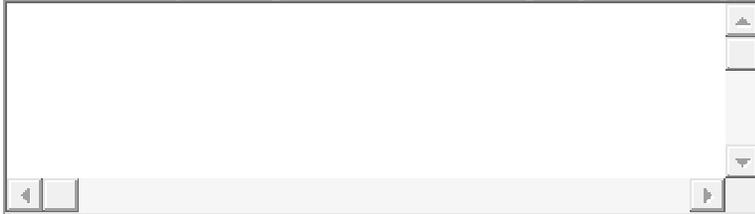

- Yes. I make the results available without using Blackboard (or plan to)
- No. I do not make the results available to students (and do not plan to)

17. How do students react to the particular response system that you are currently using?

18. Which response system product should OSU move to in the future?

- i-clicker i-clicker2
- Qwizdom Q6
- Turning Technologies Response Card NXT

19. What are your hopes and fears in adopting a new response system product?

20. What factor is paramount to you in considering the selection of a new response system product?

- Cost to students
- Time to redevelop materials
- Time to train in using new system
- Compatibility with data from prior terms
- Other

Please specify other here:

21. What factors matter most in considering a change in response system product? (Select all that apply)

- Reliability
- Cost to students
- Upload to Blackboard
- Development of questions
- Independence from presentationware (e.g. PowerPoint)
- Other

Please specify other here:

22. What level of technical support would you want if a change in response system were made?

23. How open are you to the adoption of a response system product that uses personal mobile devices, such as cell phones and laptops, as students remotes?

24. Please provide ways that the technical support currently available to you may be improved.

25. Please provide ways that the pedagogical support currently available to you may be improved.

26. Do you have anything else that you want to add to this data collection about response systems?

A large empty rectangular text input field with a light gray border and a vertical scrollbar on the right side. The field is currently blank, intended for the user to provide additional information about response systems.
